2666

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 January 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 19 January 2000 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 3.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

Art Unit: 2666

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States. .

2. Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Hiroshima (US 5,801,781).

Regarding claims 1, 7, and 8, Hiroshima teaches a method and apparatus for an encoding apparatus for packetizing (fig. 4 box 32) variable-length encoded data (MPEG1 system streams, col. 2 lines 51-54) by a packet format in which a header of a packet has an area indicating the length of the packet (fig. 7 box 136, col. 9 lines 21-23) and the range of values indicating the packet length is limited (fig. 7 box 190).

The system comprises an input means for inputting variable length encoding data (fig. 4: Video ES stream, Audio ES stream), a detection means for detecting the data length of the variable length encoding data (analyzes the ES header, col. 2 line 53), and packetizing means for packetizing the variable-length encoding data according to the output of the detection means

Art Unit: 2666

such that the packet length is set within the maximum value which can be specified in the header (col. 2 lines 58-60).

Regarding claim 8, in addition to the limitations previously listed, a recording medium which can read by a computer and which records a program for packetizing variable length encoding data by a packet format (fig. 3 box S5).

Regarding claim 2 the packetizing means generates a PES packet (fig. 4 box 32) corresponding to data conforming to an MPEG system for variable length encoding data (fig. 4 MPEG-1 system stream).

Regarding claim 3, a second packetizing means (fig. 4 box 34) for applying second packetization to packet data packetized by said packetizing means, by a predetermined length (col. 8 lines 4-7).

Regarding claim 4, the packet generated by the second packetizing means is a TS packet (col. 8 lines 4-7).

Art Unit: 2666

Regarding claim 6, a recording means for recording the variable-length encoding data packetized by the packetizing means into a recording medium (fig. 3 box S5).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hiroshima as applied to claim 1 above, and further in view of Itoh (US 5,631,888).

Hiroshima is silent on an encoding apparatus further comprising a means for capturing an image of an object and for generating image data; and encoding means for applying variable length encoding to the image data.

Itoh teaches an encoding apparatus further comprising a means for capturing an image of an object and for generating image data; and encoding means for applying variable length

Art Unit: 2666

encoding to the image data (fig. 1: EU_{1..N}, camera, MPEG1, col. 6 lines 57-63).

Therefore it would have been obvious to one of ordinary skill in the art, having both Hiroshima and Itoh before him/her and with the teachings [a] as shown by Hiroshima, a method and apparatus for an encoding apparatus for packetizing variable-length encoded data by a packet format in which a header of a packet has an area indicating the length of the packet and the range of values indicating the packet length is limited, and [b] as shown by Itoh, an encoding apparatus further comprising a means for capturing an image of an object and for generating image data; and encoding means for applying variable length encoding to the image data, to be motivated to modify the system of Hiroshima by providing for a camera and editing unit for generating MPEG-1 data. This would improve the system by providing for a reliable method for generating MPEG-1 system stream that is input into the demultiplexer of Hiroshima.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald Abelson whose telephone number is (703) 306-5622. The examiner can normally be reached on M-F.

Art Unit: 2666

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Seema Rao can be reached on (703) 308-5463. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9314 for regular communications and (703) 872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-9600.
